Tou Samarat sought to confirm the reason behind the excess increase in water charges between Mar 23 & May 23. Most likely due to dry season rates, however, CPO to investigate and confirm at next committee meeting.

Repairs and Maintenance

The following items were considered a priority:

Item	Action	Status
Kitchen Roller Door	Block access to the building from possums	CPO will source quotes to install a cover over the roller door similar to the TEGC storage room.
High water pressure - bathroom taps	Adjust water pressure so water is not spilling onto the floor	CPO to contact plumber to investigate

Moved: John Fuller Seconded: Millie Feeney

THAT the Committee receives and notes the Bi-Monthly Operational Report.

The scouts raised a question regarding the possibility of keeping ice packs in the freezer for potential injuries that may occur during their activities. They had previously received guidance against storing any items in the refrigerator. However, the committee agreed to the storage of ice packs in the freezer for injury-related purposes, clarifying that the restriction on storage pertained exclusively to food items.

Additionally, have inquired about the possibility of installing an outdoor climbing wall (grant-funded). Scouts advised cheaper option would be to erect a wall supported by

existing brick and/or concrete structure. The committee determined no existing structure onsite is suitable.

The scouts sought committee support to apply for Community Benefit Fund (CBF) grant for the installation of shelving.

Moved: Tou Samarat **Seconded:** John fuller

THAT the Committee notes and supports the scout application for CBF grant to install shelving for storage shed.

MAINTENANCE & REPAIRS

User groups are asked to submit repairs and maintenance requests to the Litchfield Council CDO as they are identified (not at committee meetings). Jobs are then prioritized and actioned according to budget with progress reported at meetings. Please communicate updates back to your user groups as appropriate.

Work completed during this period:

(Appendix A) Repairs and Maintenance log lists, prioritizes, and costs each job reported to Council from contractors and user groups. This allows jobs to be actioned according to need and budget.

Hi Ashleigh

Regarding the playground the only "quote" I got was the one below. Then I realised a climbing wall was probably going to be too much to be achievable even with the grants that I am aware of. As you know this fellow also said attaching the climbing wall to an existing concrete wall is much cheaper, around \$10 000 but unfortunately I do not believe there is that sort of wall at the reserve.

We had our committee meeting tonight and I noted that the leaders say the kids love the swing but it would be fantastic if we could get any additional equipment at all. The obstacle course is essentially broken. Any more that could be available would be wonderful. Scouts has a focus on adventure so something like a climbing wall, flying fox or similar would be ideal. I am also aware of this park that was recently put in Palmerston, although I have not been there <u>Put your ninja skills to the test – Hobart Park Ninja Obstacle Course is open!</u> [City of Palmerston (nt.gov.au). I do have a few contacts with PCC through work so I might be able to find out who to ask about the cost or provider of this park if you think that would be useful and do not have similar contacts.

I also noted at the meeting that the indoor flagpole is yet to go up. I am back in Australia now if you are needing further advice on this

As I mentioned I am not currently driving but hopefully will dial in to the meeting next week if that is OK? Best Wishes Millie

Good morning Millie,

It's great to hear from you. 😳 We would love to help your Scout group with an outdoor bouldering wall.

The best option for durability and weather resistance is fibreglass:

The above design is a traverse wall about 2.6m high x 8.5m long. This project cost around \$50,000 inc GST but excluded the cost of the soft fall area. It is single-sided, but we can also offer the option to make it double-sided.

- Each modular climbing panel is 1.2m x 1.2m in size.
- All of our equipment and installations are load-tested and engineer certified.
- To comply with Australian safety standards, bouldering walls need a soft-fall area of 2m in every direction of the climbing surface. I have attached the relevant excerpts for your reference. Two of our team members sit on the <u>Australian Safety Board for Artificial Climbing Structures</u>.
- Our team can design and build any style to match your vision and budget.
- With any design, we must complete a soil classification and bearing capacity test. You can allocate approximately \$3,500 inc GST for this.
- We supply the maintenance schedule, risk assessment and operating documents.
- Your Scout group can pick any coloured climbing holds you like.

Please let me know if you need further information at this stage.

Roughly what size area do you have available? Would you like us to send you some quotes for the different options? Do you know how much the grants are available for?

I am looking forward to hearing from you soon.

Happy Climbing! Matty

Hello

I am a on a committee for a Scout group in Darwin. We had a bit of a discussion about some interest in an outdoor boulder wall. To do something like that we would need to apply for a grant. I know every design will be different bit just as a starting point for further discussion I wondered if you could give me a rough ball park for how much an outdoor boulder wall would cost. For example one you have done recently somewhere else. I am also aware that things do not last well in the tropical sun and I'm wondering if an outdoor boulder wall would even stand up to the darwin heat, do you have any thoughts on this?

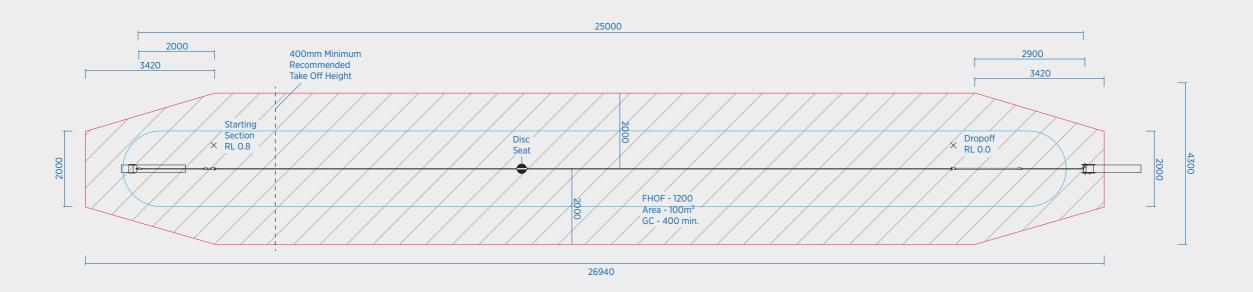

Thanks

Millie
